- NSBF funded a total of \$1.9 billion PPP loans from 2020 through the nine months ended September 30, 2021.

Barry Sloane, Chairman, President and Chief Executive Officer said, “We are extremely pleased to report our third quarter 2021 financial results. We believe we are emerging from the pandemic with momentum from our core lending operations due to technological efficiencies in lending and a robust pipeline of opportunities brought to us by our NewTracker<sup>(R)</sup> referral system. We are encouraged by the upward trajectory of our business model, and we look forward to further progress in upcoming quarters. We want to note that we do not believe that the year-over-year comparisons of loan origination volumes of 2021 to 2020 are as meaningful due to the pandemic effects on our lending platforms in 2020. As a result, we are providing the loan origination comparisons between 2021 and 2019, which was a pandemic-free business environment, and which we feel provides a more meaningful depiction of the growth of our core lending platform during this period. During tomorrow’s conference call we will discuss the growth in our SBA 7(a) lending pipeline, third quarter 2021 SBA 7(a) loan fundings, and loans approved pending closing in the month of October 2021, as well as fourth quarter 2021 projected loan fundings. In addition, we plan to discuss our ability to project growth and higher-trending results in 2022. Our conference call presentation will be available this afternoon in advance of our call and can be found through the following link [Newtek Third Quarter 2021 Earnings Presentation](#). We recently declared our fourth quarter 2021 dividend of \$1.05 per share payable on December 30, 2021. With the payment of the fourth quarter 2021 dividend, the Company will have paid \$3.15 per share in dividends in 2021, which would represent a 53.7% increase over dividends paid in 2020. Additionally, we are reconfirming our forecasted 2021 full year 2021 NII of \$0.80 per share and ANII of \$3.40 per share. We believe these metrics underscore our success in 2021.”

Mr. Sloane continued, “We believe that our level of SBA 7(a) loan fundings of \$163.9 million in the third quarter of 2021, compared to \$13.0 million and \$114.3 million of SBA 7(a) loan fundings, in the third quarters of 2020 and 2019, respectively, demonstrates that one of our core lending products and programs has strong momentum going forward. The 43.4% increase in SBA 7(a) loan fundings in the third quarter of 2021, compared to the third quarter of 2019, demonstrates our efforts to rebuild our SBA 7(a) loan pipeline from 2020 levels, which were materially impacted by the pandemic and resulting national shutdowns. In addition, we are comfortable with the upper portion of our previously forecasted range for 2021 SBA 7(a) loan fundings and have increased the lower band, and currently expect to fund between \$560 million and \$600 million of SBA 7(a) loans in 2021. In addition, NBL is forecasting a record amount of SBA 504 fundings and/or closings of between \$125 and \$150 million in 2021. For the nine months ended September 30, 2021, NBL has closed \$100.1 million of SBA 504 loans, compared to \$21.8 million and \$26.3 million of SBA 504 loans during the same periods in 2020 and 2019, respectively. Our non-conforming conventional loan program has experienced a slow start, however we remain confident in the joint venture business model of originating non-conforming commercial loans and issuing securitized financing as part of our business plan. The Company will address its options to refinance more expensive debt and lower our cost of capital during tomorrow’s conference call.”

Mr. Sloane concluded, “Our portfolio companies in payment processing and technology solutions continue to track well, delivering non-credit related reoccurring income streams. We forecast that our payment processing and technology solutions portfolio companies will generate previously forecasted 2021 EBITDA. We look forward to a more detailed discussion of our financial results and expectations during our third quarter 2021 earnings conference call scheduled for tomorrow morning at 8:30 am EST.”

### <sup>1</sup>Use of Non-GAAP Financial Measures - Newtek Business Services Corp. and Subsidiaries

In evaluating its business, Newtek considers and uses ANII as a measure of its operating performance. ANII includes short-term capital gains from the sale of the guaranteed portions of SBA 7(a) loans and conventional loans, and beginning in 2016, capital gain distributions from controlled portfolio companies, which are reoccurring events. The Company defines ANII as Net investment income (loss) plus Net realized gains recognized from the sale of guaranteed portions of SBA 7(a) loan investments, less realized losses on non-affiliate investments, plus the net realized gains on controlled investments, plus or minus the change in fair value of contingent consideration liabilities, plus loss on extinguishment of debt, plus or minus an adjustment for gains or losses on derivative transactions.

We do not designate derivatives as hedges to qualify for hedge accounting and therefore any net payments under, or fluctuations in the fair value of,

our derivatives are recognized currently in our GAAP income statement. However, fluctuations in the fair value of the related assets are not included in our income statement. We consider the gain or loss on our hedging positions related to assets that we still own as of the reporting date to be "open hedging positions." While recognized for GAAP purposes, we exclude the results on the hedges from ANII until the related asset is sold and/or the hedge position is "closed," whereupon they would then be included in ANII in that period. These are reflected as "Adjustment for realized gain/(loss) on derivatives" for purposes of computing ANII for the period. We believe that excluding these specifically identified gains and losses associated with the open hedging positions adjusts for timing differences between when we recognize changes in the fair values of our assets and changes in the fair value of the derivatives used to hedge such assets.

The term ANII is not defined under U.S. generally accepted accounting principles, or U.S. GAAP, and is not a measure of operating income, operating performance or liquidity presented in accordance with U.S. GAAP. ANII has limitations as an analytical tool and, when assessing the Company's operating performance, investors should not consider ANII in isolation, or as a substitute for net investment income, or other consolidated income statement data prepared in accordance with U.S. GAAP. Among other things, ANII does not reflect the Company's actual cash expenditures. Other companies may calculate similar measures differently than Newtek, limiting their usefulness as comparative tools. The Company compensates for these limitations by relying primarily on its GAAP results supplemented by ANII.

## 2 Note Regarding Dividend Payments

Amount and timing of dividends, if any, remain subject to the discretion of the Company's Board of Directors. The Company's Board of Directors expects to maintain a dividend policy with the objective of making quarterly distributions in an amount that approximates 90 - 100% of the Company's annual taxable income. The determination of the tax attributes of the Company's distributions is made annually as of the end of the Company's fiscal year based upon its taxable income for the full year and distributions paid for the full year.

## Note Regarding PPP Income

The Company's financial results for 2020 and the nine months ended September 30, 2021, includes income generated from NSBF's origination of loans under the Paycheck Protection Program (PPP), which ended during the third quarter of 2021, and should not be viewed as recurring.
