Subsequent Second Quarter 2018 Highlights

- On July 10, 2018, S&P Global Ratings raised its rating on the Class A Notes issued by the Newtek Small Business Loan Trust 2010-1 from AA to AAA.
- The Company's shareholders approved, among other things, the application of the modified asset coverage requirements set forth in Section 61(a)(2) of the Investment Company Act of 1940, as amended by the Small Business Credit Availability Act, at the Company's special meeting of shareholders, held on July 26, 2018. As a result, the Company's asset coverage requirements for senior securities will be reduced from 200% to 150%, effective July 27, 2018.
- On July 31, 2018, Newtek Business Lending, LLC ("NBL"), a newly formed wholly owned portfolio company, closed on a \$75.0 million SBA 504 credit facility with Capital One, with a \$75.0 million accordion feature to increase borrowing capacity to \$150 million, which will be available to originate loans under the SBA 504 loan program.

Barry Sloane, Chairman, President and Chief Executive Officer said, "We are proud to report another strong quarter with growth across all of our key metrics, exceeding the analysts' consensus estimates³ for Adjusted Net Investment Income by \$0.02 per share. Our technologically based business model continues to drive our strong performance and growth. In the second quarter, we continued to realize tremendous year-over-year percentage growth in our loan referral dollar volume and units of approximately 148% and 299%, respectively contributing significantly to the 32.2% year-over-year percentage growth in our SBA 7(a) loan fundings in the second quarter of 2018. In addition, our portfolio companies continue to see growth in SBA 504 loans and line of credit business, and we look forward to the rollout of our newer programs including non-conforming loans."

Mr. Sloane continued, "We thank our shareholders for their approval last week at our Special Meeting of Shareholders to reduce our asset coverage ratio to 150% from 200% thereby allowing us to increase our debt-to-equity ratio from 1:1 to 2:1 and giving us the ability to further grow our balance sheet. With this increased flexibility to access debt capital, we believe it will reduce our dependence on equity capital raises and raise growth capital on a newer balanced approach, taking greater advantage of the use of lines of credit and cost-effective securitization transactions. We believe that the continued traction in our business model and our shareholders adoption of the application of the modified asset coverage requirement will enable us to continue to grow our business and continue to achieve strong financial results. As such, we recently announced our third increase this year in our 2018 annual dividend forecast to \$1.80 per share, which would represent a 9.8%

increase over the Company's 2017 annual dividend payment of \$1.64 per share. We believe this sets us apart in the BDC sector as we believe many BDCs are struggling to maintain their dividends, and in some cases reducing their dividends."

Mr. Sloane concluded, "We have a significant amount of information that we will discuss during our earnings conference call tomorrow morning including advances in SBA 504 lending, our anticipated launch of our non-conforming loan business, as well as additional staffing and technological investments."

¹Use of Non-GAAP Financial Measures - Newtek Business Services Corp. and Subsidiaries

In evaluating its business, Newtek considers and uses ANII as a measure of its operating performance. ANII includes short-term capital gains from the sale of the guaranteed portions of SBA 7(a) loans, and beginning in 2016, capital gain distributions from controlled portfolio companies, which are reoccurring events. The Company defines ANII as Net investment income (loss) plus Net realized gains recognized from the sale of guaranteed portions of SBA 7(a) loan investments, less realized losses on non-affiliate investments, plus or minus loss on lease adjustment, plus the net realized gains on controlled investments, plus or minus the change in fair value of contingent consideration liabilities, plus loss on extinguishment of debt.

The term ANII is not defined under U.S. generally accepted accounting principles, or U.S. GAAP, and is not a measure of operating income, operating performance or liquidity presented in accordance with U.S. GAAP. ANII has limitations as an analytical tool and, when assessing the Company's operating performance, investors should not consider ANII in isolation, or as a substitute for net investment income, or other consolidated income statement data prepared in accordance with U.S. GAAP. Among other things, ANII does not reflect the Company's actual cash expenditures. Other companies may calculate similar measures differently than Newtek, limiting their usefulness as comparative tools. The Company compensates for these limitations by relying primarily on its GAAP results supplemented by ANII.

²Note Regarding Dividend Payments

Amount and timing of dividends, if any, remain subject to the discretion of the Company's Board of Directors. The Company's Board of Directors expects to maintain a dividend policy with the objective of making quarterly distributions in an amount that approximates 90 - 100% of the Company's annual taxable income. The determination of the tax attributes of the Company's distributions is made annually as of the end of the Company's fiscal year based upon its taxable income for the full year and distributions paid for the full year.
