Modest Growth In The Small Business Economy Continues

Newtek, The Small Business Authority®, Releases February 2015 SB Authority Index

NEW YORK, March 31, 2015 /PRNewswire/ -- Newtek Business Services Corp., (NASDAQ: NEWT), [The Small Business Authority](#)®, announced today the release of the SB Authority Index of small business indicators for February 2015 which reached 130.16 points. Approved SBA lending volumes, new entity formation and the ADP employment report led the increase. The SB Authority Index is up 0.13% from January 2015. On a year-over-year comparison, the SB Authority Index is up 3.61%.

Barry Sloane, Chairman, President and CEO of [The Small Business Authority](#)® commented, "The SB Authority Index, which represents the health of the small business economy, is beginning the year exhibiting some of the weakest performance we have seen in its four-year history. The special effects of an accommodative Federal Reserve policy, increased liquidity and lower levels of interest rates lose their stimulative impact after many years of repeat performance. We are hopeful the continued attractiveness of the U.S. economy for investments will continue to drive economic performance, particularly in the small business sector."
